PROFILE

Passionate and detail-oriented **Flutter Developer** with expertise in building **cross-platform mobile applications** for Android and iOS. Skilled in **Dart**, **REST API integration**, **Firebase services**, and **responsive UI/UX design** to deliver high-performance, visually appealing, and user-friendly apps. Experienced in implementing **secure authentication**, managing state efficiently, and ensuring smooth functionality across devices. Adept at translating client requirements into scalable solutions while following **best coding practices** and clean architecture principles. Committed to continuous learning, adopting new technologies, and contributing to innovative, impactful projects in the tech industry.

WORK EXPERIENCE

GaminGuruz
02/2025 – Present

- Developed and maintained two responsive cross-platform mobile applications using Flutter, ensuring consistent UI/UX across different screen sizes.
- Integrated RESTful APIs to fetch and display dynamic data using http and dio packages, improving app interactivity and performance.
- Collaborated with backend and UI/UX teams to deliver feature-rich apps on time.

HSI App

- Developed a fully responsive cross-platform mobile application using **Flutter** and **Dart**, ensuring seamless user experience across Android and iOS devices.
- Integrated **third-party REST APIs** for real-time data fetching and dynamic content rendering.
- Implemented **user authentication** (login, signup, password reset) using **Firebase Authentication** and secure API endpoints.
- Designed and developed a clean, responsive UI following **Material Design** principles and adaptive layouts for different screen sizes.
- Managed **state** effectively using Flutter's state management solutions to ensure smooth UI updates.
- Handled API integration with proper **error handling**, **data parsing**, and **caching** for better performance.
- Worked with **Firebase** services (Authentication, Firestore,) for user data storage, push notifications, and analytics.
- Followed **best coding practices**, ensuring scalable, maintainable, and testable code.
- Collaborated with APIs to fetch, update, and display data dynamically, ensuring optimal app performance.

Lunocto App

- Built a **responsive cross-platform mobile application** using **Flutter** and **Dart**, optimized for Android and iOS.
- Implemented **user authentication** with secure login, signup, and session management via REST API integration.
- Developed **CRUD functionalities** (Add, Edit, Delete, View) with seamless API communication and real-time data updates.

- Integrated **third-party REST APIs** for data retrieval and management, ensuring efficient performance and error handling.
- Designed and implemented an **intuitive, user-friendly UI** following Material Design guidelines.
- Applied **state management** techniques for smooth and reactive UI updates.
- Ensured **responsive layouts** adaptable to various screen sizes and orientations.
- Followed **best practices** for clean architecture, maintainability, and scalability.
